About

Senior fullstack developer with 27+ years of experience across web, Android mobile, system administration and embedded systems. Equally at home on front end and back end — from e-commerce platforms and mapping applications to AI assistants and voice interfaces. Known for autonomy, proactivity, and the ability to anticipate technical and functional challenges. Quickly adapts to evolving technologies and project needs, making him a reliable asset in any team he joins.

Experience

Groupe Open

January 2017 - Present

Senior Software Engineer

Lannion, France

Various missions: Web applications, Android native and hybrid, NFV security, IoT/voice assistants.

Apr. 2026 - now: Senior Fullstack Developer for BRGM - Maintenance and enhancement of the **Envinorma** web platform
